Safety instructions

Please follow the prescribed safety instructions from the vehicle manufacturer at all times.

Horrex is not responsible for damage caused in the following situations:

- Incorrect assembly or connection to the product;
- Damage to the product due to mechanical influences;
- Modifications to the product without the permission of the producer;
- Use for purposes other than described in the manual.

Info

If you do not have enough technical knowledge for the installation, then have the product installed by a specialist.

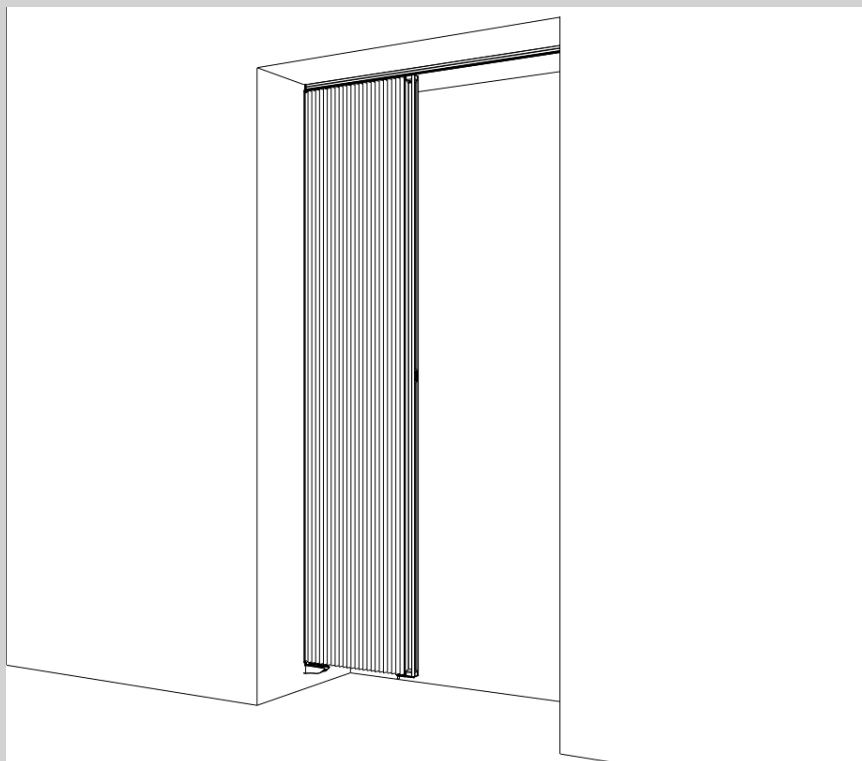

4

Use

This product can only be used in vehicles with a minimum wall thickness of 20 mm, so that the screws do not protrude from the other side of the wall.

Use only in combination with the supplied parts and spare parts from Horrex. These can be found in chapter 2 of this manual.

It is not permitted to use the product for purposes other than the usage shown below.

5.1 Check before installing

Check before installing whether there is enough room to install the product, the room divider does not block other products after installing, and if the wall thickness is enough for the screws supplied.

For safety, please pay attention to the presence of wiring and electronic components in the installation area. Pay attention to any wiring out of sight while drilling/fastening screws.

5.5 Installation (pag. 14 (A) until pag. 23 (N))

Follow steps A until N to install the product.

A: Fasten the positioner against the wall and the ceiling. Place the positioner on the wall, where eventually, the package of the room divider should be attached and in line with where the room divider is desired. Bevestig de positioner tegen de muur en het plafond. Use screw type B for this.

B: Bend the cassette profile to the side.

Note!

If the supplied screws do not grip the wall, you must use wall plugs. Make sure that you do not drill through the wall. .

C: Slide the top guide over the hooks in the package. Make sure that the clamp in the top guide slides into the package last.

D: Click the round part on the cassette profile in the top guide.

- E: Remove the protective film from the tape on the backside of the cassette profile.
- F: Hang the cassette profile on the positioner and stick the profile to the wall.
- G: Move the pull bar further towards the cassette and fasten the clamp in the top guide to the ceiling. Use screw type B for this.
- H: Fasten the top guide to the ceiling with three screws. Use screw type A for this.
- I: Move the pull bar towards the end of the top guide.
- J: Fasten the cassette profile against the wall. Use 4 screws type A for this and divide the screws equally over the profile.
- K: Fasten the clamp against the wall. Use screw type B for this.
- L: Move the pull bar to the closing wall completely.
- M: Draw the location of the magnet in the pull bar on the closing wall.
- N: Fasten the magnetic plate and magnet cover plate on the market location. Use screw type B for this.

**Note!**

The magnet on the wall and in the pull bar must be properly aligned to each other, because the roomdivider will not close properly otherwise.

5.5 Use

The blackout and mesh pull bar are stepless adjustable in height. The pull bars can be moved by using one hand to move the pull bar up and down. The blackout pull bar can be clicked on the mesh pull bar for extra closure.

5.6 Maintenance

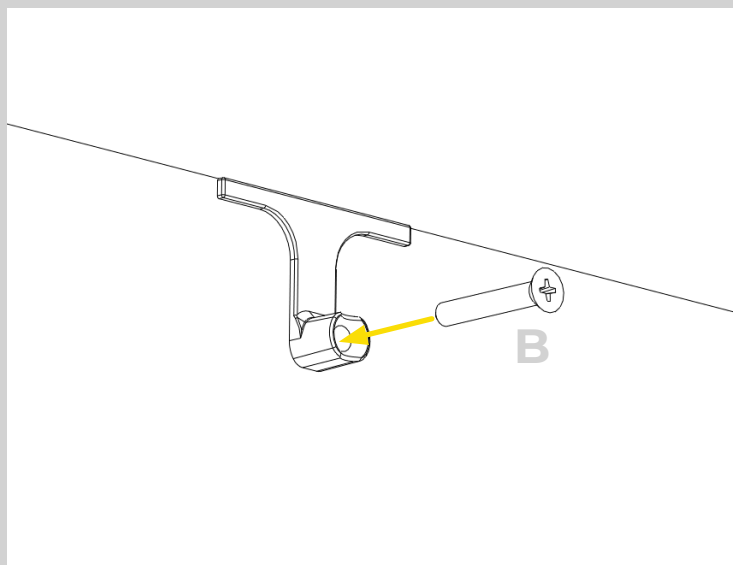

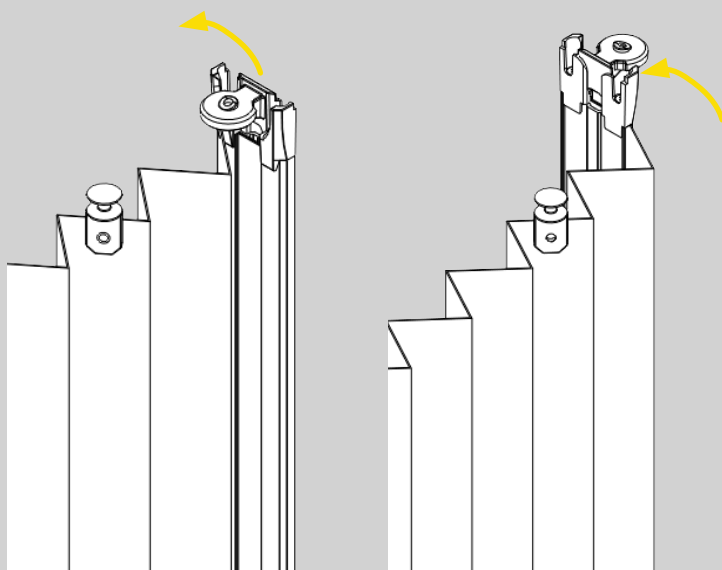

Carefully clean the product with a damp cloth regularly. Maak regelmatig het product voorzichtig schoon met een vochtige doek.

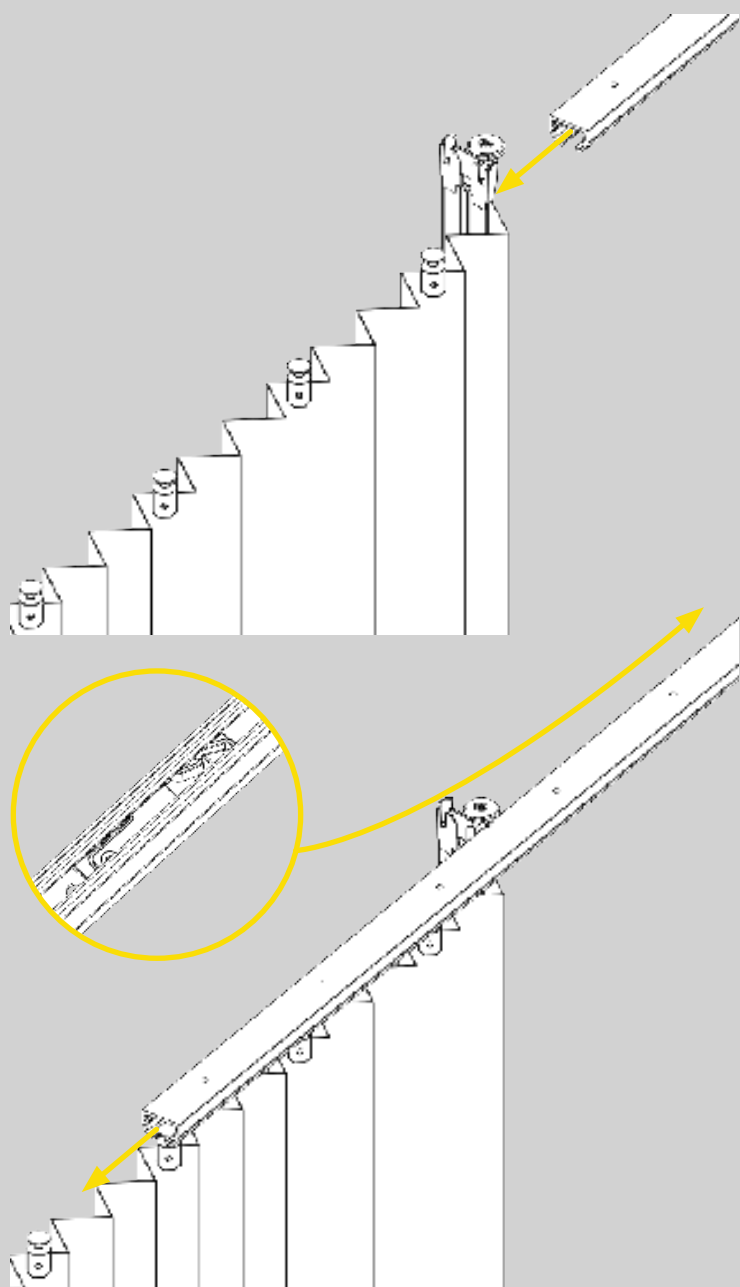

Note!

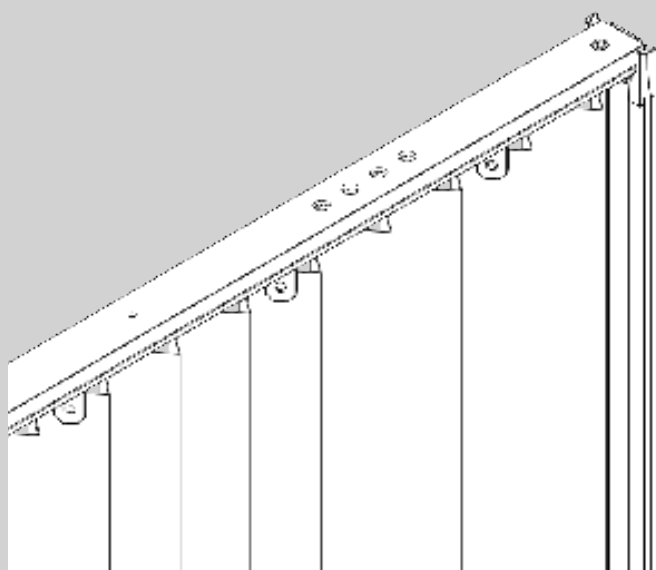

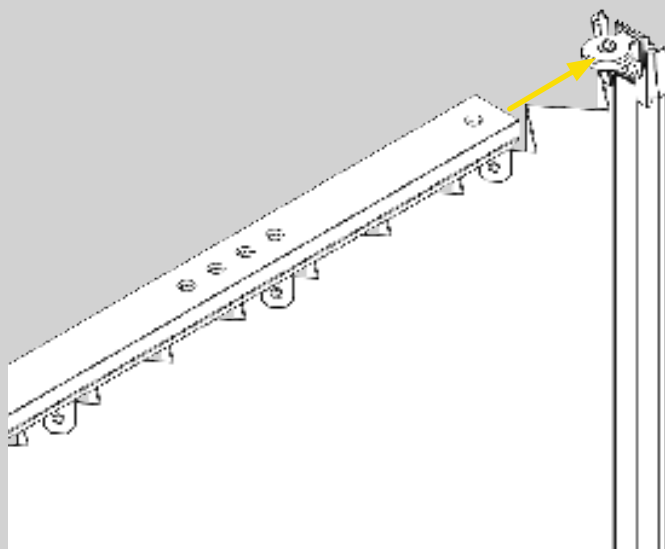

Do not use sharp objects or chemical cleaning products that could damage the product.
