# About Horrex

As part of the Driving Change group of companies, Horrex is a rapidly growing designer and manufacturer of products for the middle and high segments of the recreational vehicle (RV) market. The product range includes fly screen doors, blind and fly screen systems for windows, and room dividers, but also RV doors, windows, skylights and other products.

Horrex is headquartered in the Netherlands and operates a branch in the USA. We supply leading OEM's in 26 countries, including the United Kingdom, Germany, France, Italy, Australia, Japan, Canada and the USA.

All Horrex products are characterised by innovation, flexibility and modularity. Thanks to these key aspects, integrated in their design, Horrex's product portfolio fits an enormous variety of situations.

Horrex is able to quickly customise products to any interior design within short deadlines. Furthermore the products can be supplied completely assembled as well as a knock-down kit, all according to the customers' preferences.

**Flexibility**

**Modularity**

# Innovation

Ever since its establishment in 1987, Horrex introduced new concepts to the market and considerably innovated existing systems. Horrex was the first to launch a fly screen door for a recreational vehicle!

Over the years more innovations followed:

- Pleated fly screen versions
- Stepless pull bar
- Black-out pleated blind
- Fly screen door for camper vans
- Curved systems
- Black-out honeycomb fabric
- Fire retardant material
- Tailored products for individual customers and markets worldwide.

In line with our group's philosophy DRIVING CHANGE we aim to introduce new products every year!

# 1 Window Solutions

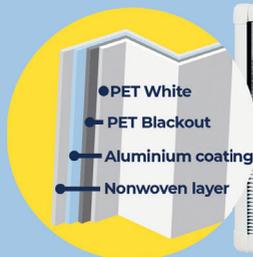

## Unlimited Creative Solutions (UCS)

Thanks to its innovative design, Horrex UCS is the most compact, quick to install window blind and fly screen system in the RV market. The attractive, yet practical design has a solid construction to ensure a quiet and hassle-free use. This is particularly important when driving a motorhome. The modular system is available with various interfaces to fit virtually any aluminium or rubber framed window in a recreational vehicle.

The shading fabric is available in single pleat and double pleat honeycomb options. Both are made of black-out material. They block light to assure a restful sleep and keep out harmful UV-rays to protect your interior. The high quality fly screen mesh allows for an excellent air flow while keeping unwanted bugs out. Both the black-out fabric and the mesh are available in fire retardant versions.

Normally, the UCS system combines mesh at the top and fabric at the bottom. However, it is possible to apply only mesh or only fabric.

## UCS Options

### Colour options

Apart from white (RAL9016), covers and corner caps are also available in cream (RAL9001) and grey (RAL7047). We provide further colours on demand at a minimum order quantity. The covers and caps are clickable and therefore easy to replace for a change of colour or repairs.

### Black-out pleated fabric

A regular pleated blind has holes in the fabric for the guiding cords. To prevent light coming through, Horrex provides a 100% black-out option consisting of cord guiders that are placed behind the fabric.

### Black-out honeycomb fabric

Due to the closed cell structure, black-out honeycomb fabric has excellent insulation properties for comfortable travelling in cold and hot climates. Cords are guided through the fabric panel and therefore invisible from either side. For a coherent appearance fly screen mesh is also available in honeycomb.

### Ventilation

In order to reduce accumulation of heat between a 100% black-out pleated or honeycomb blind and a window, Horrex's UCS will be provided with perforated profiles to allow ventilation.

# Curved Solutions

FRAME	FABRIC	SIZE
Aluminium ● ●	Honeycomb black-out and mesh	Custom

The curved UCS has been designed to fit curved windows without taking away any space from the living area. Every curved blind is executed with honeycomb black-out fabric and solid aluminium profiles tailored to the window radius. To ensure smooth operation and for a matching appearance, the combined fly screen is also supplied in honeycomb mesh.

**NEW!**

## Rollo+ Blinds

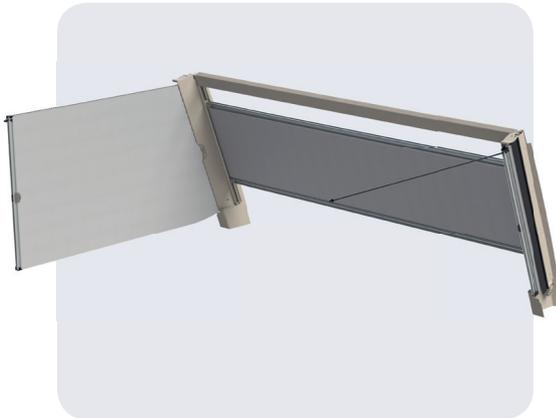

FRAME	FABRIC	SIZE
PVC ● ●	Rollo black-out and mesh	Custom

As an alternative to the UCS Solution Horrex now also offers a roller blind combined with fly screen mesh. The Rollo+ Blind frame comes in a O-shape and is available in cream (RAL9001) and black (RAL9005).

# Windscreen Blinds

FRAME	FABRIC	SIZE
PVC 	Honeycomb black-out	Custom

A black-out windscreen blind system specially designed for fully integrated motorhomes. The system consists of a top-down bottom-up front blind and two side blinds for privacy on the campsite. While driving, the driver can use the shade to prevent from being blinded by the sun. Also available in electrical version.

# Electric Solutions

FRAME	FABRIC	SIZE
Aluminium 	Honeycomb black-out and mesh	Custom

Electric blinds operation by means of a remote control. The fabric and mesh panel can be operated independently from each other. The system has a smooth and silent operation and is equipped with soft stop closing. The product can be customised further by programming preset positions. The shades operate at 12 V and are therefore independent from campsite power.

# 2 Door

## Solutions *Fly Screen Doors*

All Horrex fly screen doors are equipped with high quality pleated mesh to offer protection against insects while ensuring an excellent airflow. From the inside, the dark mesh provides an excellent view to the outside. The sliding mechanism is fully adjustable and silent in operation. Thanks to modularity of the system, the fly screen doors can suit a wide range of caravans and camper models! Horrex fly screen doors are available in an aluminium as well as in different PVC versions.

### Fly Screen Door - E-Line

A high quality PVC system matching the UCS window blind design for a coordinated interior. Additional top features include full magnet closing, bottom guider to reduce accumulation and quick installation.

#### FRAME

- PVC base
- PVC covers
- Alu covers

#### FEATURES

- Match with UCS
- Magnetic closure

### Fly Screen Door - Aluminium

The solid aluminium construction with a high quality coating ensures long durability. The optional threshold accommodates cables and reduces dirt accumulation.

#### FEATURES

- Light weight
- Price-quality ratio

# Door Solutions

## *Van Fly Screen Doors*

With expectations of future growth, Horrex long since developed a fly screen door for vans. The lightweight aluminium fly screen door also gives van owners the opportunity to enjoy fresh air and a wide-open view of the great outdoors, without having to worry about mosquitoes and other annoying insects swarming the inside of the vehicle. The curved cassette and pullbar take away just a minimum of interior space. Despite its size the screen has a smooth and silent operation. The fly screen door is available for a variety of van types.

# 3 Tailgate Fly Screens

Apart from fly screen solutions for windows and side doors, Horrex also provides manually operated screens for the back side of recreational vehicles.

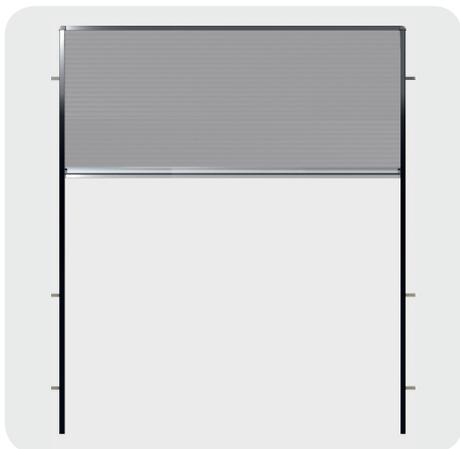

Fully adjustable screens are available for Fiat Ducato vans with hinged rear doors. We would welcome development requests for larger series of different bus camper makes and models.

For motorhomes and toy haulers (US market) we also provide fly screen solutions with optional shading for more privacy and to protect the interior against harmful UV-rays. Kindly contact us for details.

# Rear Screens

FRAME	MESH	SIZE
Aluminium ■	Pleated	Fiat Ducato

For the ever-growing camper van market, Horrex offers a fully adjustable fly screen solution for the rear opening of one of the most popular models, the Fiat Ducato. The aluminium framed rear fly screen allows users to maximise airflow in their vehicle while being protected against insects.

# Ramp Screens

FRAME	FABRIC	SIZE
Aluminium ■	Pleated mesh Pleated shade	Custom

Our ramp fabric has been specifically designed to meet the needs of the American market where toy haulers are common. The ramp screen provides insect protection for the large rear openings while users can still enjoy a cool breeze! The top-down ramp screen is fully adjustable by hand and can be equipped with an optional sun shade for more thermal comfort and privacy.

# 4 Dividers

For more privacy inside the recreational vehicle vertically sliding room dividers are available. Thanks to the innovative design the room dividers are very user-friendly and quick to mount or dismount.

In addition, they are light for their size and span. With the help of specially designed runners, the curtain stack is reduced to a minimum and takes up only a small amount of space when stored. Similarly to all other Horrex products, the room divider is highly modular and modifiable on demand. The track can be pre-bent, according to your specifications. The room dividers are available in two options, in a basic and a more luxurious XS version.

### Room Divider | Basic version

FRAME	FABRIC	FEATURE
PVC <span style="display: inline-block; width: 15px; height: 15px; background-color: #f0e68c; border: 1px solid #ccc; margin-right: 5px;"></span> <span style="display: inline-block; width: 15px; height: 15px; background-color: #a6a6a6; border: 1px solid #ccc; margin-left: 5px; margin-right: 5px;"></span>	Pleated <span style="display: inline-block; width: 15px; height: 15px; background-color: #444; border: 1px solid #ccc; margin-right: 5px;"></span> <span style="display: inline-block; width: 15px; height: 15px; background-color: #c88e4c; border: 1px solid #ccc; margin-left: 5px;"></span>	Strap closure

### Room Divider | XS Version

FRAME	FABRIC	FEATURE
Alu <span style="display: inline-block; width: 15px; height: 15px; background-color: #f0e68c; border: 1px solid #ccc; margin-right: 5px;"></span> <span style="display: inline-block; width: 15px; height: 15px; background-color: #a6a6a6; border: 1px solid #ccc; margin-left: 5px; margin-right: 5px;"></span>	Pleated <span style="display: inline-block; width: 15px; height: 15px; background-color: #444; border: 1px solid #ccc; margin-right: 5px;"></span> <span style="display: inline-block; width: 15px; height: 15px; background-color: #c88e4c; border: 1px solid #ccc; margin-left: 5px;"></span>	Click closure

### TV Blinds

The Horrex TV blind is a small divider that offers a solution to those that want to concentrate on a book or start enjoying their night's rest. The top-down pleated blind can be easily tailored to your needs with regard to dimensions and installation.

FRAME	FABRIC
Alu <span style="display: inline-block; width: 15px; height: 15px; background-color: #f0e68c; border: 1px solid #ccc; margin-right: 5px;"></span> <span style="display: inline-block; width: 15px; height: 15px; background-color: #a6a6a6; border: 1px solid #ccc; margin-left: 5px; margin-right: 5px;"></span> U-shape	Pleated <span style="display: inline-block; width: 15px; height: 15px; background-color: #c88e4c; border: 1px solid #ccc; margin-right: 5px;"></span> <span style="display: inline-block; width: 15px; height: 15px; background-color: #fff; border: 1px solid #ccc; margin-left: 5px;"></span>

# 5 Windows and Rooftop Blinds

**NEW!**

## Windows

Available in radius 5000 version!

Combine with UCS

Thanks to its high strength powder coated aluminium frame, the Horrex straight and curved (R5000) RV Flush acrylic window is the newest must have in the market. With its double glazed, UV-resistant tinted acrylic glass this window is ideal for sun-drenched summers. The multi-angle telescopic hinges combined with our matching blind allow an excellent airflow control. Altogether this combination is a great addition to your motorhome or caravan.

FRAME	WALL	SIZE
Alu <input checked="" type="checkbox"/>	Thickness 25-40 mm	Custom

# NEW! Skylights

The RV Skylight is one of Horrex' novelties in 2019! The window frame is made of high quality ASA and the window itself is double glazed acrylic. The skylight has an easy operation with gas struts, which allow you to open the window up to 80 degrees. All Skylights are equipped with a pleated blind and flyscreen as well as 12V DC optional interior LED lights. The Skylight is suitable for roofs with a thickness between 25-60mm.

FRAME	ROOF	SIZE
ASA <input type="checkbox"/>	Thickness 25-60 mm	400x400 700x500 900x600

# NEW! Roof Vents

The Horrex Roof Vent is a small roof window solutions for fresh air in the kitchen and/or bathroom. It can be opened manually up to 50 degrees and includes a fly screen. The Roof Vent is available in a small size (280x280) without LED lights and larger size (320x320) with LED lights. The Hatch is available in transparent and white. The Roof Vent is suitable for a roof thickness of 28-60 mm.

Horrex offers perfectly tailored absorption refrigerators to the amount of space available in your motorhome or caravan. With its silent operation, minimalistic design and great cooling performance, Horrex refrigerators are ideal to keep food and beverages fresh. There are two different build-in refrigerator models for RV's.

## Doors

The RV entrance doors from our partner Konrad Baur is a great addition to Horrex' product range. These doors are characterized by their outstanding quality, durability and easy assembly. The door comes with a GRP or an aluminum outside finishing, a chrome interior handle, a FAWO 2-point lock system as well as a fly screen. There are several optional features like a central locking system, gas spring, trash bin and a window and blind. Furthermore, the exterior door can be tailored to your required dimensions.
